

3 March 1961

MEMORANDUM FOR: Chief, Document Division

STATINTL

THROUGH : Chief, Control Branch

SUBJECT : Recommendation to Make a Full Bibliographic Entry  
on all Nodex-M's.

1. The Typing Unit of the Processing Section is presently making both long and short entries on Source Cards for Nodex-M's. The decision for a full or short entry has been made as each new procedure was decided upon. Over a period of time this has resulted in some confusion to typists as to what categories require a short or long entry. Some recurring Defense Agency documents which are filmed, but nodexed, are required to have a full source card and are batched as a Special Nodex; e.g., Army Batch No. 06-14-50 Special Nodex. This tells the typist that a full source card is needed.

2. In order to make the processing of Nodex-M's less complex it is recommended all such documents receive a full bibliographic entry. It is acknowledged that this will increase the work load of the Typing Unit, but this added typing is not considered beyond the capacity of the current personnel.
